				DATE MAILED: 12/29/2004		

Please find below and/or attached an Office communication concerning this application or proceeding.

1) Notice of References Cited (PTO-892)

Paper No(s)/Mail Date 3.

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)

4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. . . .

6) Other:

5) Notice of Informal Patent Application (PTO-152)

DETAILED ACTION

Page 2

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-11 and 18-20, drawn to an optical spectrum analyzer including a tunable filter having a periodic output response with a free spectral range FSR and having a bandwidth B; an AWG optically coupled to receive light from the output port; and wherein m<n when a single detector is associated with a single wavelength and wherein m<2n when two detectors are associated with a single wavelength, classified in class 385, subclass 14.
- II. Claims 12-15, drawn to an optical spectrum analyzer including a resonator for receiving an input optical signal and for providing an output optical signal having an output response that is substantially periodic in intensity with respect to wavelength such that light within a first group of spaced channels is substantially attenuated while simultaneously a second group of spaced channels are substantially un-attenuated, classified in class 385, subclass 5.
- III. Claim 16, drawn to a method of providing wavelength information related to an optical signal having a plurality of channels of information encoded therein, including the steps of receiving the second periodic signal and spatially demultiplexing the second group of channels; and, f) detecting with the array of detectors information related to the second group of channels, wherein same detectors used in step (c) are used in step (f) for detecting, classified in class 385, subclass 31.

Application/Control Number: 10/705,866

Art Unit: 2883

The inventions are distinct, each from the other because of the following reasons:

Page 3

- 2. Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case Group III invention can be used as an Add/Drop filter in a WDM communication system rather than as an spectrum analyzer in Group I and/or Group II invention.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I and/or II, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Mr. Teitelbaum on 12/21/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Contact Information

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Cyrus Kianni whose telephone number is (571) 272-2417.

The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 6:00 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font, can be reached at (571) 272-2415.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9306 (for formal communications intended for entry)

or:

Hand delivered responses should be brought to Crystal Plaza 4, 2021 South Clark Place, Arlington, VA., Fourth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956.

K. Cyrus Kianni Patent Examiner
